

The Government College of Engineering and Ceramic Technology was established in 1941. The motive behind the establishment of this institute was to train the migrants from the then East Pakistan to make their livelihood with pottery making. It is one of the oldest institutes offering course in Ceramic Technology in India. Gradually the institute has become an institute of higher learning offering Ph.D, M.Tech and B.Tech programs in Ceramic Technology, Computer Science and Engineering and Information Technology. The alumni of the institute are very well placed in their professional career. This has made this institute distinct from other institute.

The institute is affordable to economically weaker section of students.

1. The fee of under graduate programs of the institute is very low. The tuition fee of Ceramic Technology, Computer Science and Engineering and Information Technology are Rs. 500/-, Rs.1000/- and Rs. 2000/- per month respectively.
2. The institute grants Half-freeship and Full-freeship to students belonging to specific income-brackets. In addition to these, there are different scholarship schemes listed below:

#### **List of top scholarships for students of West Bengal**

S.No.	Name of Scholarship	Provider Name
1.	Swami Vivekananda Merit Cum Means Scholarship	Government of West Bengal
2.	Bigyani Kanya Medha Britti Scholarship, West Bengal	Jagadis Bose National Science Talent Search (JBNSTS), Kolkata
3.	West Bengal Post-Matric Scholarship for SC/ST/OBC	Backward Classes Welfare Department, Government of West Bengal
4.	West Bengal Pre-Matric Scholarship for SC ST Students	Backward Classes Welfare Department, Government of West Bengal
5.	Hindi Scholarship Scheme, West Bengal	Department of Higher Education, Science and Technology and Biotechnology, Government of West Bengal

There is another scholarship for girl students. The Kanyashree Prakalpa Scheme was introduced by the Department of Women Development and Social Welfare, Government of West Bengal. The United Nations has awarded the West Bengal the first place for public service on account of the Kanyashree Prakalpa scheme. The key objective of Kanyashree Prakalpa is to improve the status of girl child in the state by incentivizing schooling of all teenage girls and preventing their early marriages.

In addition to these there is a student credit card scheme. The Higher Education Department, Government of West Bengal has introduced the Student Credit Card Scheme for the students of

West Bengal to enable them to pursue education without having any financial constraints. This scheme is designed to support the students to pursue secondary, higher secondary, madrasah, undergraduate and post graduate studies including professional degree and other equivalent courses in any School, Madrasah, College, University and other affiliated institutes within and outside India. Students studying in various coaching institutions for appearing in different competitive examinations like Engineering, Medical, Law, IAS, IPS, WBCS etc, can also avail the loan under this scheme. A student from West Bengal can obtain a maximum loan of Rs. 10 lakhs @ 4% per annum simple interest from the State Cooperative Bank and its affiliated Central Cooperative Banks and District Central Cooperative Banks and Public/ Private Sector Banks. 1% interest concession will be provided to borrower if the interest is fully serviced during the study period. The upper age limit for the interested students has been kept as 40(forty) years at the time of applying for loan. The repayment period shall be fifteen (15) years for any loan availed under this Credit Card including the Moratorium/ repayment holiday. For details kindly go through the Scheme given in this portal.

- To make students employable

One of the most important outcomes of Technical Education is the employability. Personal attributes that contribute to overall employability include commitment, adaptability, honesty and integrity, reliability, ability to deal with pressure, motivation, and cultural fit with the employing organisation. Basically they are the set of achievements, skills, expertise, and personal attributes that help to achieve success in chosen career.

The grooming of students with an eye to infuse different qualities necessary for employability and becoming a complete human being with above mentioned attributes starts from the day a student joins the institute.

The Government College of Engineering and Ceramic Technology provides career counselling and guidance for competitive examinations to its students regularly. Career counselling is increasingly seen as having a huge significance in a student's life. Today's youth are more keen to carve out their own paths rather than following the traditional routes of their predecessors. This career counselling and guidance for competitive examinations are done at different stages:

#### 1. Induction programme

The goal of higher education is to nurture human beings responsible for their own betterment and capable of sustaining society and nature, besides enabling them to procure a position to earn their livelihood. The incoming undergraduate students are often influenced by their parents and society to join higher study without understanding their own interests and talents. There is high probability that students fail to develop an understanding about the goals of Educational Institutes as well as higher education. During induction programme there are sessions where people from industries and the Professor of training and placement of the institute delivers lecture to make students aware of the prospect of different branches of Engineering and skill to be attained to become employable. This makes student focussed from the very first day of the program.

1. Mentor:

There is a very effective Mentor-Mentee scheme in the institute. The students meet their mentor regularly. Mentors also counsel students and offer guidance for competitive examinations.

1. Wipro:

There is a regular program of guidance for competitive examinations by WIPRO through its Talent Next Program. The main objective of this training program is to make the aspiring engineers get acquainted with the conceptual as well as practical knowledge in Java and J2EE. In this training program Wipro company is providing direct job opportunities for the students based upon their performance. After completion of this training program students will get the sufficient knowledge in Java and J2EE to get the job opportunity in various MNC companies. The training provided by the WIPRO is not limited to Java only. They also provide training on many industries recommended and validated advanced technologies such as Artificial intelligence foundation etc.

1. Tata Consultancy Services (TCS):

The Tata Consultancy Services also conducts regular career guidance program to make student employable. These include different soft skills and technical skills. The main focus area is to help students in gaining knowledge in emerging technology which helps them in employability.

1. GATE counselling:

Graduate Aptitude Test in Engineering or GATE is a national-level engineering entrance examination. Students participate in the GATE examination for M.Tech admissions or PSU recruitments. Since the level of competition is high, candidates should have an idea about how to prepare for GATE. There is a group of teachers in the institute who offers guidance for GATE to the students of the institute. Most of the students of the institute come from poor economic background. They cannot afford to go for GATE coaching outside. About ten lakhs of candidates appear in the GATE exam for higher studies as well as job opportunities every year in the country. Every year students of this institute score high in the GATE with the guidance of the faculties of the institute.

A glimpse of the Induction program is as follows.

Apart from class room teaching, students are exposed to industrial practices in the form of industrial training and internship. An internship is important because it can present the student with new skills and opportunities that may not be received otherwise. Interns gain technical knowledge within the industry of their choice by working directly with professionals in that field. All students of Ceramic Technology and a large number of students of Computer Science

and Engineering and Information technology undergo industrial training and intership in reputed industries every year.

Another important component of the curriculum is the project work. Project Work-Based Learning gives a thorough practical exposure to a problem upon which the project is based. Projects are developed generally in groups where students can learn various things such as working together, problem-solving, decision making, and investigating activities. Students are encouraged to complete project work in the insustry. In view of this, the final semester curriculum has been made flexible with no course except project for Ceramic technology and Computer Science and Engineering.

In addition to these, the institute has MOU / Collaboration with different academic institutes and industries for research, internship, industrial training, projects etc. The industrial training is compulsory for students. The list shows for internship, training, project work, industrial training, student / collaborative research as applicable for students during the last five years.

**Number of functional MoUs/linkages with institutions/industries in India and abroad for internship, on-the-job training, project work, student / faculty exchange and collaborative research during the last five years**

Sl.	Title of the MOU/Collaborative activity	Name of the organization with whom MOU/Collaboration being signed	Name of the Concerned/ Participant from GCECT
1	Generic nature for Academic Collaboration , Training Programme, Internship Programme, Specific R&D Projects, Faculty Development etc.	Digital Resonance Pvt. Ltd.	GCECT
2	Generic nature for Academic Collaboration , Joint Conference, Training Programme, Internship Programme, Specific R&D Projects, Faculty Development etc.	Golden Lion Consulting Services Pvt. Ltd.	GCECT
3	Generic nature for Academic Collaboration , PhD Guidance, Joint Conference, Training Programme, Internship Programme, Specific R&D Projects, Faculty Development etc.	Refrac Consultancy & Services Pvt. Ltd.	GCECT
4	Studies on Antibacterial	West Bengal University of Animal & Fishery	GCECT

	activity of Nano Ceramic Materials in relation with particle size	Science	
5	Collaborative Research between TCS & GCECT	Tata Consultancy Services Ltd. (TCS)	GCECT
6	Collaboration/ linkage between TRL & GCECT	TRL Krosaki Refractories Limited, Belpahar	GCECT
7	Collaboration/ linkage between Aditya Birla Insulator & GCECT	Aditya Birla Insulator	GCECT
8	Collaboration/ linkage between Calderys India & GCECT	Calderys India Refractories Ltd.	GCECT

### INDUSTRIAL INTERNSHIP

**YEAR : 2021-2022**

Every students of the institute are brought under mentoring program. The goal of the mentoring program is to establish a trusting relationship with accountability and responsibility from the mentor and mentee. This programme helps students to feel at home in the institute.

The mentor-Mentee scheme of the institute is as follows:

There is a difference in the academic environment of a school where students completed 10+2 education with that of a professional institute.

The goal of a professional institute is to train the student with professional skill, develop their overall personality and make them employable. Many students of the institute are from rural areas and with diverse socio-economic backgrounds. As they are from rural areas, the environment of the institute is entirely new to them. Hence they face many difficulties in the course of their stay in the institute.

To overcome this situation, the institute has implemented Mentor Mentee Program to guide students. Mentoring provides students emotional and instrumental support, guidance, encouragement and better environment in the institute. A mentor plays a vital role in nurturing students and has a positive impact on students' persistence and academic achievement. A mentee

can approach his / her mentor for both educational and personal guidance. It is conducted to help the students to strengthen their varied capabilities and to build an interpersonal relationship between the faculties and students.

Mentoring mentee program at the Government College of Engineering and Ceramic Technology is a structured programme in which each faculty is assigned with the task of mentoring about 8-10 students. First year students will have mentors from first year departments, when they move on to subsequent years they will be detached from the preceding mentors and attached to succeeding faculty from that particular department.

The mentor will perform the following functions. The list, of course, cannot be exclusive. A mentor can always do more for the benefit of the students.

### **Responsibilities of a Mentor**

- Meet the group of students at least twice a month.
- To maintain personal details of the students including their address, contact numbers, overall academic performance and progress. It will help the mentor in monitoring the academic growth of the students.
- Continuously monitor, counsel, guide, and motivate the students in all academic matters.
- Advise students regarding choice of electives, projects, summer training, etc.
- Contact parents/guardians if the situation demands e.g. academic irregularities, negative behavioral changes, and interpersonal relations, detrimental activities, etc.
- Advise students in their career development/professional guidance.
- Maintain contact with the students even after their graduation.
- Intimate HOD and suggest if any administrative action is called for.
- Maintain a detailed progressive record of the student.
- Professional Guidance – regarding professional goals, selection of career, higher education.
- Career Advancement – regarding self-employment opportunities, entrepreneurship development, morale, honesty and integrity required for career growth
- Course work specific – regarding attendance and performance.

### **Responsibilities of a Mentee:**

- Attend meeting regularly
- Fill personal information in the form at the time of joining the mentor- mentee system.
- Provide details of attendance, continuous assessment, examination, co-curricular, extra-curricular activities to the mentor whenever asked for.
- Repose confidence in the mentor and seek his/her advice whenever required.

### **The role of HOD:**

- Meet all mentors of the department at least once a month to review the proper implementation of the system
- Advise mentors wherever necessary.
- Initiate administrative action on a student when necessary.
- Keep the head of the institute informed.

Discipline is a very important attribute to become successful in the career. The institute has a set of code of conducts that are displayed in the portal of the institute for easy dissemination. The institute has a strict attendance monitoring system through ERP software solution. The attendance of the students is messaged to the guardian periodically to make them aware of the performance of their wards.

The institute is an autonomous institute. The curricular of the institute have been updated giving more emphasis on continuous evaluation. This is evident from the academic regulation of the institute. The academic regulation is available in the portal of the institute.

There is a complete transparency in the evaluation system of the institute. The marks of the student In Mid semester examinations and End semester examinations are finalised after students have gone through evaluated answer scripts in from of the evaluator.

The communication skill both verbal and written is a very important component for employability in multinational organisations. The language laboratory of the institute takes a very important role to enhance communication skill of the students. A compulsory course of English along with Language laboratory, group discussion and seminar are inbuilt in the curriculum.

The institute has ICT enabled class rooms for proper delivery of contents in the class. There is a provision to group slow learners and fast learners in the class. Extra classes are arranged online or offline mode even beyond normal working hour of the institute to help them.

In order to keep students updated of the current technologies as per requirement of the business houses, elective subjects are introduced. The list of elective subjects varies in each year to keep pace with demand of the industries. Hence the lists of electives are dynamic in nature.

More over students can earn additional twenty credits from courses available in online platform such as NPTEL etc based on their choice to enhance their employability.

Apart from this, experts are invited to deliver lectures on topic of importance for employability and to make students fit for working in a social environment.

The institute makes all efforts to groom the students in such a manner so that they come out at the end of the study as good human beings with nationalistic spirit.

The performances of the students are visible from their placement record and success of the students in competitive examinations such as GATE etc. The good performance and success stories of alumni of this institute are yard stick of academic processes.

**Placement of outgoing students and students progressing to higher education is shown :**

The students of the institute regularly participate in NSS, social awareness program and other outreach activities.

The Institution works through all means tries to create conducive environment for creating environmental awareness and sustainability among students and neighbourhood through distinctive approach. The Institution has been focusing on environment and sustainable development by different means to create awareness

NSS Unit of Govt. College of Engineering and Ceramic Technology organised a Rally on 26th April 2022 in the locality of College for the awareness of community people on “ENVIRONMENT”. The Rally covered the approximated area of 1.8 Kilometres. The Environmental Rally was escorted by the Beliaghata Police. In addition to banner, the hand held posters were also used during the Rally. The Rally was started from Govt. College of Engineering and Ceramic Technology campus and proceeded through Beliaghata Main Road (beside Rasmoni Bazar) via CIT More to Kali Mandir Bus Stop (before Phool Bagan) and then returned to our College following the lane beside Divine Nursing Home. There were about 70 participants of the rally including faculties and staff of the institute. The program was coordinated by Mr. Bimal Pal, NSS Program Officer and Assistant Professor of Department of Computer Science and Engineering. This rally has drawn attention of the locality through which the rally passed.

OUTCOME: The campaign on environment creates awareness in the mind of people about the necessity of protection of mother earth.

## Tree Plantation drive in the campus

Cleaning of a park under Swachh Bharat program

The institute has policy of Gender equity. There are different programs conducted under the initiative.

Students of the institute under the umbrella of the NSS unit involve themselves in many social activities for neighbours. Eye checking is one of the activities.
